# Payment Request

**Allow customers to pay you on the spot using any device, with secure payment links sent to them via SMS or email.**

Get paid faster by sending customers email or SMS messages with “Pay Now” links

Keep sensitive card data away from your contact centres, whilst supporting customers making payments over the phone

Give customers the flexibility to pay via credit card or digital wallet, using their preferred device

Follow up overdue payments automatically

## Quick and easy payments

Payment Request uses SMS or email messages containing ‘Pay Now’ links that allow customers to pay instantly and securely using a mobile, laptop, desktop or tablet. Customers can use their credit card or pay quicker with digital wallets such as Apple Pay, Masterpass and Amex Express Checkout.

## Useful for all industries

Payment Request can be used for retail purchases, service bills, council dues, school fees and more, improving cashflow for virtually any business.

## Configurable messaging and function

You can personalise the message content and configure the action you want to request the customer to take, such as make a payment, tokenise a card, update a token, pay and tokenise a card or pay and update a token.

## Automatic follow-ups for overdue payments

Remove the need to chase up late payments manually. You can configure Payment Requests to be sent out automatically when customers miss a payment or when the payment has been declined, making it easier for them to settle on the spot.

## Secure payments for contact centres

This solution helps Contact Centres comply with PCI DSS regulations by keeping credit card data away from their environment. Agents can send a Payment Request to customers whilst on a call, and support them throughout the entire payment process without ever being exposed to the actual card details. Agents can also monitor the payment status on their screen and track exactly how long the payment takes.

# Start using Payment Request in 3 simple steps:

1.

Go to the Sign Up page at (URL linking to eCommerce Sign Up landing page) and choose between '30 Day Free Trial' or 'Purchase a Package'.

2.

Select the package that best suits your business and sign up.

3.

Once you've signed up, log on to (URL for logging on to Linkly Merchant's portal) with your registered email address and password, go to MySuite and select Payment Request
